& Whitney Wasp series - Wikipedia - The Pratt & Whitney R-985 Wasp Junior is a series of nine-cylinder, air-cooled, radial aircraft engines built by the Pratt & Whitney Aircraft Company from the 1930s to the 1950s. These engines have a displacement of 985 in³ (16 L); initial versions produced 300 hp (220 kW), while the most widely used versions produce 450 hp (340 kW). Pratt & Whitney R-985 Wasp Junior - Wikipedia - Like all good engineers, those designing aircraft engines are greedy. They always want more power, more durability, and more efficiency. They also want it in the smallest, lightest package possible.
